

Count Me In Activity Challenge

Who thought maths couldn't be fun?

We've partnered with Clydesdale Bank's Count Me In programme to show you that it really can be.

There are 2 online games and 4 downloadable activity sheets to take part in.

Children can take part in these activities in two ways:

1. Be a helper
Children aged 6+ can be helpers to their younger brothers, sisters and friends. Younger children can build their number skills as older children learn how to be good helpers.

OR

2. Be a learner
Pre-school children, or older children who might need a little more practice, can take part in the activities themselves to boost their confidence in maths.

To get started, visit www.cbonline.co.uk/we-care-about-here/community/countmein

Head to the Count Me In web pages (detailed above), and take part in the activities as a helper or learner

Tick the activities off as you go, and give each activity a star rating!

When you've completed all the activities, show this sheet to your teacher to collect your Passport stamp

Don't forget to log your credit on the e-Passport too!
Head to epassport.f2uni.com/Public/Login and click on Passport

Activity Checklist			COLOUR IN THE STARS TO RATE THE ACTIVITY
